

SPRĘŻARKA TŁOKOWA

# Seria WA

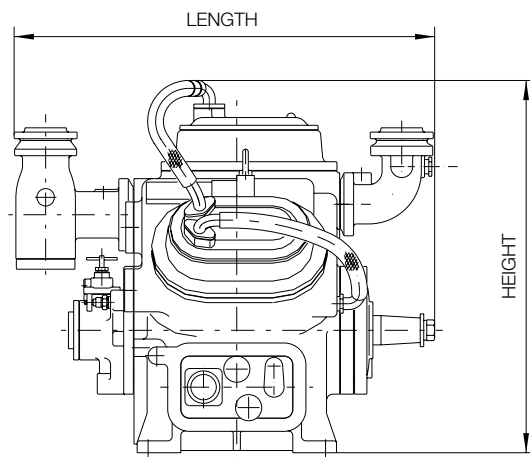

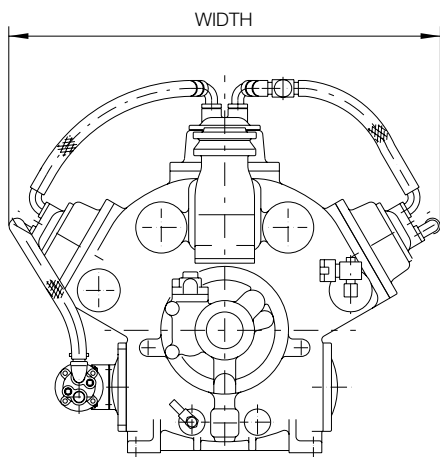

### Seria WA

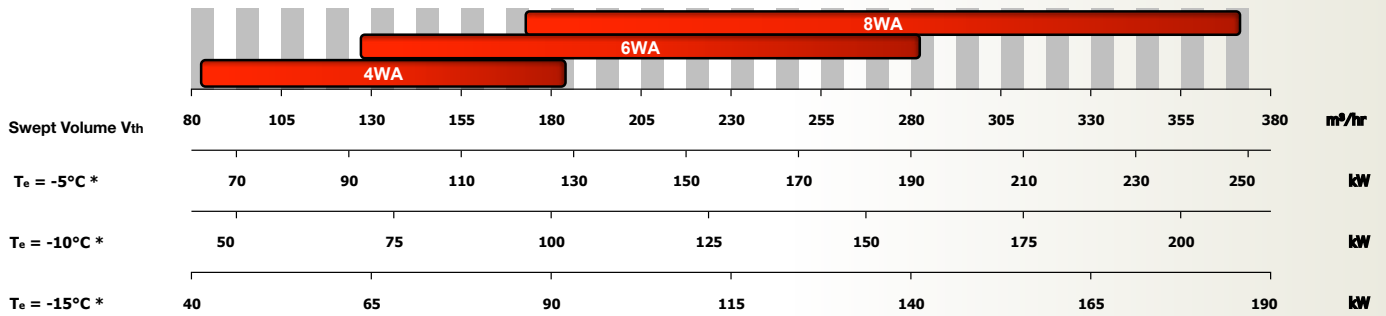

to jedno z najpopularniejszych sprężarek MAYEKAWA średniej wielkości.

The compressor is sold since 1955, and has since then gone through several minor design changes resulting in its current top performance model. This compressor can run at a maximum speed of 1450 rpm and has an excellent opportunity for creating a small, lightweight, high speed economical system design.

Our WA series is designed to operate with natural refrigerants (NH<sub>3</sub>, CO<sub>2</sub>, and hydrocarbons), HFC's (R507, R404a, R134a, etc.) and CFC's and is suitable for cooling, freezing, air conditioning systems and leisure markets.
